Secretary
Federal Communications Commission
445 12th Street, SW
Washington DC 20554

Re: MB Docket No. 17-105

Dear Ms. Dortch:

Anthem Broadcasting LLC, owner USA Radio Networks, has reviewed the Comments of Shainis & Peltzman, Chartered which were filed in the above-referenced Docket. We are also familiar with the Petition for Rulemaking filed by Geo-Broadcast Solutions, RM No. 11659, which is referenced in the Shainis & Peltzman Comments.

Anthem urges the Commission to take whatever steps it deems appropriate to expeditiously modify Section 74.1231(i) of the Commission's rules, allowing for origination of programming on booster facilities. As explained in the Shainis & Peltzman Comments, the public interest benefits are significant. Anthem believes that adoption of this minor rule change will allow for a much needed boost for the radio industry, the economy, and not least, the public welfare.

USA Radio Networks have nearly 600 licensed affiliates for which it provides news and programming in markets both large and small. Anything which has the potential to provide

greater revenue without detracting from spectrum usage, such as this proposal, would have a positive effect on the industry.

We talk with our affiliates every day and a frequent topic of our conversations are rules which date from 1934 which, given today's technology, actually inhibit the conduct of business.

We see, every day, operators who want to do things to increase their service to their communities but are not able to take advantage of technologies such as this because of regulatory issues.

This proposal both makes sense and has no deleterious effect on anybody.

Floyd G. Brown, Chairman

Anthem Broadcasting LLC
